

Human Economic Forum 2025 – Vision 2040

Chamber of Deputies, 2–11 December 2025

Vicolo Valdina Complex, Piazza di Campo Marzio – Rome

PROGRAMME

EXHIBITION AND MEETINGS – SALA DEL CENACOLO

The archaeologists meet the public to present the exhibition “The Fascinating Spirituality of Ancient Egypt”

2 December – Opening with Hon. Giorgia Latini and Patrizia Piacentini (12:00 pm)

The inaugural session will feature Patrizia Piacentini, Full Professor of Egyptology at the University of Milan and Director of the Aswan Archaeological Mission. A member of the Accademia dei Lincei, she is recognised as one of Italy’s leading Egyptologists. Her talk will guide the audience on a journey through archaeology and spirituality, illustrating how ancient artefacts and rituals preserve a universal message still profoundly relevant today.

5 December – Meeting with Massimiliana Pozzi Battaglia (5:00 pm)

The 5 December session will be led by Massimiliana Pozzi Battaglia, Egyptologist, founder of the Archaeological Cooperative Society and co-author (with Patrizia Piacentini) of *Egyptology. An Introduction*. With a career dedicated to archaeological research, museum cataloguing and scientific dissemination, Pozzi will guide participants through a symposium merging scientific rigour and humanistic narrative.

11 December – Meeting with the Professors of the Chair of Egyptology, University of Milan (4:00 pm)

The final meeting will feature lecturers and researchers from the University of Milan’s Chair of Egyptology, with the participation of Federica Scatena and Massimiliana Pozzi Battaglia. The speakers will discuss the concept of *maat* and the spirituality of ancient Egypt, answering questions on the latest findings of the archaeological mission directed by the Chair in Egypt. A valuable opportunity to engage directly with the academic world and reflect on the role of research in shaping a shared cultural consciousness.

MEETINGS – SALA DELLA SACRESTIA

2 December – 6:00 pm to 7:00 pm

Theme: “Money: Sacred and Profane!”

As in Ancient Egypt—where wealth was tied to justice and reciprocity—money today reveals the relationship between ethics and power.

Giuseppe Vegas, Father Giuseppe Buffon and Paola Cocco will illustrate how wealth, if detached from moral purpose, generates social disorder, while when oriented towards the community it becomes a tool of harmony and cohesion.

Moderator: Gianluigi Serafini.

3 DECEMBER 2025 – 3:00 pm to 7:00 pm

Theme: “Inverse Transhumanism: Technology and Humanity”

Starting from the Egyptian notion that humans are a bridge between earth and sky, Giovanni Spinapolicie reinterprets the human–technology relationship as a return to authenticity. Not a transcendence of the human, but its regeneration: as in temples, where architectural technology served the spirit, so too today AI must remain at the service of the human being.

Theme: “At the Table with Art: Food, Symbol and Community”

In ancient Egypt, banquets were ritual, communal and transcendent events. Salvatore Schiavone will explore how cinema and theatre reproduce this symbolic function: nourishment is not only feeding, but offering belonging.

Word of the Day: COMMUNITY, the original home of the human and the core of social *maat*.

Theme: “Law and Sustainable Development: Responsibility Toward Future Generations”

In Egyptian thought, continuity between generations was a foundation of order. Angelo Buonfrate and Antonio Uricchio will reinterpret law as a tool to protect intergenerational balance, showing how *maat* can become a legal—rather than merely archaeological—criterion.

Theme: “ESG: Fashion or Substance?”

Egyptian inscriptions and archives recorded the impact of the pharaoh’s actions on the people.

Starting from this, Luca Ferrais—interviewed by Alfredo Romano—argues that sustainability cannot be just a language but a responsibility.

As *maat* demanded coherence between word and deed, so ESG requires coherence between governance and behaviour.

9 DECEMBER 2025 – 2:00 pm to 7:00 pm

Theme: “Maat and Civil Mediation: Restoring Harmony Between Citizens and Businesses”

In Ancient Egypt, justice sought not punishment but restoration of harmony. Guided by Ivan Giordano, Salvatore Vigliar and Francesco Libutti, this session shows how the principle of *maat* lives on in contemporary civil mediation—transforming conflict into dialogue, reducing disputes and rebuilding trust.

Theme: “Today’s Scribes: Mediation in Public Administration”

Egyptian scribes safeguarded transparency and coherence. Ivan Giordano, Salvatore Vigliar, Michele Macrì, Salvatore Schiavone and Saverio Congedo reinterpret that ancient function within modern public administration: mediation becomes a tool for procedural justice, dispute prevention and administrative balance.

Theme: “Seeing the Heart (*ib*) in the Age of Algorithms: AI and Justice”

For the Egyptians, judging meant “seeing the heart”—grasping the person’s inner truth. Luigi Viola, Massimiliano Nicolini, Marco Casu, Ivan Giordano, Salvatore Vigliar, Paola Giacalone and Alex Grech will explore how AI can support—without replacing—human conscience in decision-making. A new judicial *maat* emerges: transparency, reliability and coherence between data, responsibility and human dignity.

Theme: “Sekhem and the New Global Order: Meditation, Consciousness and Technological Power”

Sekhem—vital force—ordered Egyptian existence. Marco Guzzi and Marta Amendola argue that meditation is a return to inner harmony, essential for ethical use of technology. Only a transformed consciousness can shape a human and responsible global order.

Theme: “Will Artificial Intelligence Replace Corporate Boards?”

Inspired by the Egyptian model, where the pharaoh was not an absolute ruler but custodian of cosmic order, Sabrina Bruno and Massimo Canducci will discuss how enterprises should balance technological tools with human wisdom and social equilibrium. Moderator: Gaia Francieri.
